Manufacturing the Thermo Equipment

COMBINED BOILERS

Combined boilers have installed additional heat exchanger next to the electro heater. They are designed for mounting on the central heating system or other similar local installations of closed type. Combined boiler is economical, efficient and reliable system for water heating. Models are available with volume from 80 to 150 liters.

TECHNICAL DATA

Volume (liters)	80	100	120	150
Heater Power (W)	2000	3000	3000	3000
Tension (V)	230	230	230	230
Work Pressure MPa (bar)	0,6(6)	0,6(6)	0,6(6)	0,6(6)
Water Connection	1/2"	1/2"	1/2"	1/2"
Heating Time T-75°C (h)	1,75	4,5	5,4	6,3
Height (mm)	720	890	1050	1220
Radius (mm)	450	450	450	450
